Dear F.C.C

We have two XM radios in our household. Both of which are used by Long Haul Truckers. The traffic and weather reports are especially valuable to us. We have used these services to keep us on time for deliveries. In regards to the traffic reports, they help us determine which routes to take to avoid traffic jams and avoid incidences of roll overs and road closing due to accidents. We also extensively use the weather updates to avoid road closings due to inclement weather and what routes to take to avoid bad weather conditions such as flooding or tornadoes. Both of which just recently kept us on time for our delivery and prevented us from being right in the middle of one such tornado that was announced by weather radio, that the local weather did not report due to the radio tower being destroyed. We find these services exceptional and we gladly pay for this service as well as the great music, news and especially the Nascar Station, which we can listen to instead of having to watch these on T.V. Stations. We can keep moving America and enjoy what we like. Please Oppose HR 4026 and keep my family safe and content when we can't be at home.

Respectfully,

Tori Wiggins
Truckers Wife.
